Information Systems
Undergraduate Students
\$10.00 p/hr

Company Background

VuQuest, Inc. provides a Web-based customer support platform for access and delivery of interactive video-based technologies and sales support tools designed to make products that require assembly, set-up or installation more profitable and easier to sell.

Project Overview

VuQuest, an early stage provider of consumer product support web-based solutions offers two internship opportunities:

Software Testing and IT Project Services:

- Testing and evaluation of platform application: Assist with the testing and evaluation of the member support, client support, Video Instruction Guides, administration functions and features of the ShowUhow application to ensure proper functionality compared to the design specification or test cases for each feature.
- IT Services Project: Work with the Vice President of Platform Technologies to assist with IT support requests, conduct IT research and development and implementation of various IT projects to improve the operations and support the company objectives.

Video Production Services:

- Update activity and resource related data in project management software.
- Coordinate administrative tasks such as managing production crew schedules, product shipping, filing, etc.
- Assist with organizing materials and resources used during video shoots

Skills and Requirements

- Completed at least 20 units in Information Systems, Computer Engineer or technology related degree program
- Hands-on experience with use of the Internet for shopping and social media websites
- Proficiency with Microsoft Office applications and Windows XP
- Attention to detail
- Good written and verbal communication skills
- Solid work ethic and commitment to complete tasks assigned
